Appendix B: Alternative Wording Suggestions

This list includes a selection of commonly-used medical terms, research jargon, and other complex words paired with suggestions for plain language alternatives. It is a compilation of original entries and entries selected from a variety of plain language word lists publicly available on the intranet:

- <u>Simple Words and Phrases</u> (plainlanguage.gov)
- Glossary of Human Subjects Terminology (University of California at Davis, Office of Research)
- <u>Plain Language Principles and Thesaurus for Making HIPAA Privacy Notices More</u> Readable (HIPAAdvisory, Phoenix Health Systems)
- Writing Style Guide and Dictionary of Plain English (Duncan Kent & Associates Ltd.)

This list is by no means exhaustive, and we encourage you to refer to other resources as needed. For definitions of more specialized medical terminology, try the University of Michigan Medical School <u>Simplification Guide to Medical Terms</u>; for definitions of research jargon, try the <u>glossary of research terms</u> developed by The Cochrane Collaboration.

Instead of	Try this
	(You may need to use different forms or combinations depending on how the term is used)
A <u>TOP</u>	
abdomen	stomach, tummy, belly
abrasion	scrape, scratch
absorb	take in fluids, soak up
abstain from	don't, don't use, don't have, go without
accompany	go (along) with, come with
accomplish	carry out, do
accordingly	so, for that reason, as a result
accrue	add, gain, build up
accumulate	add, build up, collect, gather
accurate	correct, exact, right
acquire	get

^{*} Developed in collaboration with the Group Health Plain Language Task Force

activate	begin, start
acute	sudden, new, recent; intense flare-up, serious pain
addictive	habit-forming
additional	added, extra, more, other,
address	talk about, discuss
adequate	enough
adjacent	next to, by
administer	give
advantageous	helpful, useful
adverse	harmful, bad
adversely impact	hurt, set back
affirmative	yes, positive
aggravate	make worse
aggregate	all together, added together, combined
agitation	anxiety, restlessness, nervousness
ailment	sickness, illness, health problem, complaint
allergen	something that causes allergies
allergic rhinitis	hay fever
alleviate	ease, decrease, lessen
allocate	divide, give based on a plan
allow	let
alopecia	hair loss
alternative	choice, option
ameliorate	improve, get better, make better
ambulate	walk
ambulatory	able to walk
amend	change
ameliorate	improve
analgesic	pain killer
analyze	look at, study, examine
anaphylaxis	shock or serious allergic reaction
anesthetic (general)	a drug that puts you to sleep
anesthetic (local)	a drug that numbs an area of your body
angina (or angina pectoris)	chest pain
anterior	front
anticipate	expect
anticoagulant	blood thinner
anti-inflammatory	helps swelling go down
apparent	clear, plain, show up

appreciate, appreciation	thankful, thanks	
apprise	inform, tell	
appropriate(ly)	correct(ly), proper(ly), right	
approximate(ly)	about, around, roughly	
arrhythmia	irregular heartbeat, (condition in which or when) the heart does not have a steady beat	
arteriosclerosis (or atherosclerosis)	hardening of the arteries	
articulate	say, state, tell	
ascertain	find out, learn	
ascorbic acid	vitamin C	
asphyxiate, asphyxiation	choke (ing), suffocate (tion)	
aspirate, aspiration	fluid in the lungs	
assay	lab test	
assess	learn about, study	
assessment	interview, quiz, rating, report, test	
assist, assistance	help, aid	
associated with	linked to, related to	
asymptomatic	without symptoms	
atopic dermatitis	itchy red rash	
attain	meet	
attempt	try	
audit	review, inspect, look at	
aural	hearing	
В тор		
bacteria	germs	
beneficial	helpful, good	
benefit (noun)	good effect, advantage	
benefit (verb)	help, be useful to	
benign	isn't harmful, not cancer	
bilateral	on both sides	
biopsy	sample of tissue from part of the body	
blood glucose	blood sugar	
blood profile	series of blood tests	
bradycardia	slow heart beat	
C TOP		
calculate	add up, figure out	
capable, capability	able, ability	
carcinogen	something that can cause cancer	

carcinoma	cancer
cardiac	heart-related, related to the heart, (of or in) the heart
cardiologist	heart doctor
cardiovascular	heart and/or blood vessel
carpal	wrist
category	kind, class, group
catheter	a tube for taking fluids into or out of the body
catheterize	put a tube into (part of the body)
caveat	warning
cease	stop
cell culture	tissue sample or a study of the tissue
cellulitis	skin infection
Central Nervous System (CNS)	brain and spinal cord
cerebral hemorrhage (or cerebral accident or cerebrovascular accident or CVA)	stroke, blood clot in the brain
cessation	stop, pause
chemotherapy	drugs to treat cancer
chest film	chest X-ray
chronic	lasting a long time, life-long
clavicle	collarbone
clinical	(related to) medical care
clinical trial	a research study that tests new treatments on patients
coagulate	clot, stop flowing
cognitive	learning, thinking
cognizant	aware (of)
coitus	sexual intercourse
collaborate with	work with
colon	the large intestine
colonoscopy	exam of the inside of the rectum and colon (or large intestine) using a flexible tube with a lens at the end
colorectal	(of or in) the colon or rectum
commence	begin, start
commitment	promise
commonly	most often
communicate	write, tell, talk, let you know
compensate, compensation	pay, give money
complete	finish, do, fill out, take part in
comply with	follow

component	part, section, phase
comprise	form, include, make up
computed tomography	CT scan or imaging test, 3-D X-ray
conceal(ed)	hide (hidden)
concerning	about, on
condition	how you feel, health problem
conduct(ing)	do(ing)
congenital	present at birth, born with
congenital anomaly	birth defect
congestive heart failure	condition where the heart isn't pumping hard enough
conjunctivitis	pink eye
consequence	result
consequently	so, because of this
consider	think about
consolidate	combine, join, put together
contains	has
constitutes	is, forms, makes up
construct	build, make
contingent upon	if
continue	go on, keep (on)
contraceptive	birth control
contract(ing) [a disease]	get(ing) [a disease]
contraindicated	not recommended, can cause a bad reaction, not permitted
contrast medium	dye
contribute	give, help
controlled trial	a research study that compares a one treatment to another treatment
contusion	bruise
convene	meet
convenient	handy, works well
conversion	change
convulsion	seizure
coronary	(related to) the blood vessels that bring blood to the heart, (of or in) the blood vessels that bring blood to the heart
coronary thrombosis	heart attack
correlation	link
correspond	similar to, be in agreement with
crucial	important
currently	now
cutaneous	(in, of, or about) the skin, (related to) the skin
D TOP	

debilitating	weakening
decision	choice
decrease	lower, reduce
deem	think, believe, consider
deep vein thrombosis	a blood clot deep in the vein
deficiency	not enough
deficit	shortage
degeneration	getting or gets worse
delete	remove, take out, cut, drop
demonstrate	prove, show
depart	leave
describing	tell about
designate	choose, name, select, appoint
detect	find (out)
determine	decide, find (out), learn (if)
detrimental	harmful, bad
develop	occur, start to get, happen
diabetic	person who has diabetes
diagnose, diagnosis	(find the) problem or condition
diagnostic procedure	a test to look for a problem
diaphoresis	sweating
difficulties	problems, trouble
diffuse	widespread, scattered
digit	finger or toe
dilute	add liquid, make less strong
diminish(ed)	go down, decrease, less (of), lower
disclose	give, share, tell, show
discoloration	change in color
disconnect	undo
discontinue	drop, stop
discover	find (out), learn if
discrepancy	conflict, difference, error, split
disseminate(d)	give, share, send, pass on, (spread out)
diuretic	drug that makes you urinate (or pee) more
diverticulitis	condition in which the colon becomes inflamed or infected
donate	give
double blind	a study in which neither the researchers nor the subjects know what drug the subject is getting
dressing	bandage
due to the fact	because

dysfunction	not working
dysmenorrhea	painful period cramps
dyspepsia	heartburn
dysphagia	trouble swallowing
dyspnea	trouble breathing
E <u>TOP</u>	
echocardiography, echocardiogram	pictures of the heart
edema	swelling
efficacy	how well (a treatment) works
elect	choose, pick
electrolytes	salts in the blood that control the balance of fluids in the body
elevate	high, higher, raise
eliminate	get rid of, remove, cut, end, go to the bathroom
elucidate	explain
embolism	lump of blood, clot
emesis	throwing up, vomiting
empirical evidence	proof
employ	use
employment	work
enable	allow, let
encounter	meet, meeting
encourage	urge
endeavor	try
endometrium	lining of the uterus
enlarge	get bigger
enroll	be in, join
ensue	follow(ing), occur after, happen next
ensure	make sure
enumerate	count
enuresis	problems controlling urine, bladder control problems
epidemiologist	scientist who studies diseases
episode	bout or attack
equilibrium	balance
equivalent	equal
equitable	fair
eradicate	get rid of
eruption (skin)	rash or breakout
especially	mainly, mostly
establish	set up; also, show, prove

etiology	cause	
evaluate	look at, study, measure, rate	
evidence of	proof of, signs of	
evident	clear	
exacerbate	make worse	
examination	exam	
examine	look at, study	
excise	remove by cutting, cut out	
exhale	breathe out	
exhibit	show	
	speed up, make (something) go faster, make (something) easier,	
expedite, expeditious	(fast, quick)	
expend	spend	
experiencing	feeling, going through, having	
expire, expiration	end (date), run out	
explicit	plain, clear	
external	outside (the body)	
exude	ooze	
F <u>TOP</u>		
facilitate	help, ease, make (something) easier	
failed to	did not	
feasible	can be done, possible, workable	
febrile	fever	
femur	thigh bone, bone that connects the hip and knee	
finalize	complete, finish	
forfeit	give up, lose	
formulate	work out, form	
forward	send	
fracture(d)	break, (broken)	
frequently	often, a lot	
fructose	fruit sugar	
function	act, role, work	
fundamental	basic	
furnish	give, send	
${f G}$ top		
gastric	stomach-related, (related to) the stomach, (of or in) the stomach	
gastroenterologist	doctor who treats problems with digestion	
gastroesophageal reflux (GERD=gastroesophageal reflux disease)	heartburn	

generalized	wide-spread	
gerontological	age-related, (related to) aging, about aging	
gestation	pregnancy	
GI specialist	doctor who treats problems with digestion	
glucose	sugar	
gradually	slowly, over time	
gynecologist	doctor trained in women's health	
H <u>TOP</u>		
hazardous	dangerous, not safe	
hearing impairment	hearing loss or deafness	
heart failure	heart isn't pumping hard enough	
hematocrit	amount of red blood cells in the blood	
hematoma	bruise	
hemorrhage	heavy bleeding	
hence	so	
hepatic	liver	
heritable, hereditary	genetic, traits that are passed down in families	
herpes simplex type 1	cold sore	
herpes simplex type 2	herpes	
herpes zoster	shingles	
heterogeneous	different, mixed	
hirsutism	unwanted hair growth	
homogeneous	same or similar	
however	but	
hyperopia	farsighted(ness)	
hypersensitivity	very sensitive to	
hypertension (hypotension)	blood pressure that's too high (blood pressure that's too low)	
hyperthyroidism (hypothyroidism)	overactive thyroid, too much thyroid hormone (underactive thyroid, not enough thyroid hormone)	
hypothesis	idea being tested	
hypoxia	not enough oxygen in the blood	
I TOP		
identical	same, exactly alike	
identified	found	
identify	find (out), pinpoint, name, show	
idiopathic	we don't know what causes it	
immediately	right away, now, at once	
	cover in	

ina na una ath a na na c	treatment to make the immune system work better (boost immune
immunotherapy	system)
impact	change, affect
impede	slow, make it harder to
implant	put into the body
implement	carry out, put in place, start
in addition	also, too, and
in vitro	in a test tube or lab
incapacitate	make unable to do
inception	start
incidence	number of new cases, how many times it occurs
incision	cut, slit
including	along with, like, such as
incorrect	wrong, not right
increase, increased	raise, higher
indicate	mean, show, suggest, tell us, fill in, write down
indication	sign, symptom
ineffectual	not effective, useless, of no use
infectious (disease)	passed from one person to the next
infertile	not able to get pregnant
inflammation	swelling, painful swelling
influence	affect
inform	tell
informed consent	deciding to get a certain treatment or be in a research study after thinking about the risks and benefits
infusion	putting a substance into the body through the blood
ingest	eat or drink
inhale	breathe in
inhibit	stop
inhibitor	drug that slows down or stops something from happening
initial	first
initiate	begin, start
injection	shot
in lieu of	instead (of)
innovation	new idea, new way
inquire	ask
institute	start, set up
instrument	tool
insufficient	not enough, too little
intake	what you eat or drink; what goes into your body

intent, intention	aim, goal, purpose
interface (web or computer interface)	meet, work with, (program)
intermittent	off and on
internal	inside the body
interior	inside
internist	doctor
interrupt	stop
intervention	treatment
intramuscular	in a muscle
intravenous	in a vein
intubate	put a tube down your throat into your airway so you can breathe
invasive procedure	to go into the body through a cut or puncture
investigation	study
investigator(s)	researcher(s), people doing the study
issue	give
J TOP	
jaundice	yellow-looking skin
juvenile (condition)	childhood (condition)
K TOP	
L TOP	and door
laceration	cut, tear
lactation	breast-feeding
lactose	sugar found in milk
larynx	voice box
lateral	side, on the side
lethargic	sluggish; very sleepy
limb	arm or leg
lingual	tongue
lipids	fats in the blood
lipid profile (or lipid panel)	amount of fats in the blood
locality	place
locally, localized	in one area
locate	find
location	place
lymphoma	cancer of the lymph nodes (or tissues)
M TOP	
magnetic resonance	pictures of the body taken with magnetic energy

imaging (MRI)	
magnitude	size
maintain	keep, support
malaise	general feeling of being sick, feeling bad
malignant, malignancy	cancer that may spread to other parts of the body
malingering	pretending to be sick
majority (of)	most
manifestation	sign
manner	way
materialize	appear
maximum	greatest, largest, most
mean (statistical)	average (statistical)
medication	drug, medicine
menarche	first menstrual period
menopause	when periods stop
menses, menstruation	period
metabolism, metabolize	how the body breaks down food into energy
metastasize	spread
metastatic	cancer that has spread
miliaria	prickly heat
minimal (minimum)	least, smallest, slight (at least)
minimize	decrease, lower, reduce
mobile (mobility)	able (ability) to move around
moderate (verb)	limit, control
modify, modification	change
monitor	check (on), keep track (of), watch
morbidity	disease rate, illness rate
mortality	death rate, death, dying
motility	movement, ability to move
musculoskeletal	muscles and bones
mutation	genetic defect
myocardial infarction (MI)	heart attack
N TOP	
nausea	upset stomach, feeling like throwing up
nebulous	vague, not clear
necessary	needed, need to
negligible	small
neuralgia	nerve pain
neuron	nerve cell

nodule	lump			
noncompliant	not following a treatment plan			
noninvasive	without using surgery, needles, or cutting the skin			
notification, notify	to tell, let know			
numerate	count			
numerous	many			
nutrient	food			
O TOP				
objective	aim, goal			
obligate, obligation	require, bind, mean that (you) have to, duty			
observe	see			
obstruct	block or close			
obtain	get, take			
occasionally	sometimes			
occlude (occlusion)	block (blockage)			
occupation(al)	job, work			
oncologist	doctor who treats cancer			
oncology	study or treatment of cancer			
onset	start			
opportunity	chance			
optimum, optimal	best, greatest, most			
option	choice, way			
oral (oral administration)	(given) by mouth			
orthopedic	(related to) the bones, (of or about) the bones			
osteoporosis	brittle bone disease, having bones that can break easily			
otherwise	if not			
otolaryngologist	ear, nose, and throat specialist			
outcomes	results, (long-term) changes			
P TOP				
palliative	make feel better but not cure, ease symptoms			
pallor	paleness			
palpate	feel			
palpitation	fast heartbeat			
parameter	limit, boundary			
participate (ing, ion)	be, do, join, opt in, take part (ing)			
parturition	labor and delivery, childbirth			
pathogen(esis)	cause of a disease			
perforation	hole			
perform	do			

perioral around the mouth peripheral on the edge, not central permit(ted) allow(ed), let persist last, keep going persistent lasting personnel staff, people pertaining to about, of, on, related to pervasive wide-spread pharmaceutical, pharmacotherapy pharyngitis sore throat physiological having to do with the body pigmentation color placebo an inactive substance, sugar pill, a pill that contains no drug or medicine plasma glucose blood sugar portion part positron emission tomography possess have, own posterior back postoperative (post-op) after surgery preadolescent preteen preclinical isn't causing symptoms yet, no signs yet predisposed, predispositon previous, ye medicine previous, previously previous, previously prioriows, previously prioriows, previously prioriows, previously priorioms, previous, previously priorion, part presente with shave preserve prevalent previous, previously prioriopal investigator predisposed, previously priorioms, previously priorioms, part on country in the presente of occurrence, common, large amount in a population previous, previously prioriom previous previous previous previous previous, previously prioriom presente prediction previous	periodically	from time to time
